

## Online Application for Community www.gaw.com/community

In order to perform the initial evaluation of your community, we will need to receive some basic information. Please gather all information contained in the most recent US Census (<http://www.census.gov>) or in Vermont, <http://maps.vcgi.org/indicators/profiles.cfm> , for your community to complete some of the following questions.

The more detailed information that is provided by you, the more likely it is that Great Auk Wireless will consider your Town for deployment. Partially completed applications will not be considered.

Please explain the level of community support that exists within your Town in bringing a high-speed provider to the community.

How long has your community been searching for a high-speed Internet provider? What providers have you spoken with in the past and what was the result?

What other broadband service providers exist within your community and what areas do they provide service in? Please indicate broadband provider's coverage area on a topographic map and include map in the mail-in packet.

Has your community applied for and/or received any state or federal funding to deploy a broadband network? If so, please attach copy of grant application and funding award (if applicable). This would include any USDA Community Connect Broadband Grants, Vermont Telecommunications Agency grants, etc...

If Great Auk Wireless were to bring broadband into your area, how many people would purchase the service? Do you have a list of interested individuals at this time?

Please attach the following information to the questions above and mail completed packet to:

Great Auk Wireless  
Community Planner  
PO Box  
Island Pond, VT 05846

Information to include with packet:

- Printout of the US Census Data for community found at [www.census.gov](http://www.census.gov).
- Topographic map reflecting all buildings within the community, ideally using GPS coordinates.
